INDEX TO AUTHORS

Page references to the senior author's professional history are bracketed

ADAMS, J. M. See KALLMAN, ADAMS, WILLIAMS, and IMAGAWA, 379

ALLARD, CLAUDE. See DE LAMIRANDE, ALLARD, and CANTERO, 291

ALLEN, ROBERT D., and ROSLANSKY, JOHN D. The consistency of ameba cytoplasm and its bearing on the mechanism of ameboid movement. I. An analysis of endoplasmic velocity profiles of *Chaos chaos* (L.), [543] 437

ASCENZI, ANTONIO, and FABRY, CLAUDINE. Technique for dissection and measurement of refractive index of osteones, 139

BARRNETT, RUSSELL J., and PALADE, GEORGE E. Enzymatic activity in the M band, [309] 163

BECKER, NORWIN H., and OGAWA, KAZUO. Changes in desoxyribose nucleic acid per nucleus in renal compensatory hypertrophy in the rat, [311] 295

BÉLANGER, CÉCILE. See BÉLANGER, 197

BÉLANGER, LEONARD F. Alpharadiography: a simple method for determination of mass concentration in cells and tissues, [309] 197

BENNETT, H. STANLEY, and LUFT, JOHN H. *s*-Collidine as a basis for buffering fixatives, [144] 113

BERGERON, JOHN A. See STEFFENSEN and BERGERON, 339

BESSIS, MARCEL, and BRETON-GORIUS, JANINE. Différentes aspects du fer dans l'organisme. I. Ferritine et micelles ferrugineuses, [310] 231

— and —. II. Différentes formes de l'hémosidérine, 237

BRANDT, PHILIP W., and PAPPAS, GEORGE D. Mitochondria. II. The nuclear-mitochondrial relationship in *Pelomyxa carolinensis* Wilson (*Chaos chaos* L.), 91

—. See PAPPAS and BRANDT, 85

BRETON-GORIUS, JANINE. See BESSIS and BRETON-GORIUS, 231, 237

BURGE, R. E. See SILVESTER and BURGE, 179

CANTERO, ANTONIO. See DE LAMIRANDE, ALLARD, and CANTERO, 291

CASCARANO, JOSEPH, and ZWEIFACH, BENJAMIN W. *In vitro* studies of the metabolism of tissue slices. I. Metabolic and physical factors influencing the penetration of tetrazolium salts, 215

CASE, NORMAN M. Hemosiderin granules in the choroid plexus, [544] 527

CHAPMAN, GEORGE B. Electron microscope observations on the behavior of the bacterial cytoplasmic membrane during cellular division, 221

CHARLES, ARWYN, and INGRAM, JOHN T. Electron microscope observations of the melanocyte of the human epidermis, [143] 41

CLARK, WALLACE H., JR. See HIBBS and CLARK, 71

COËRS, CHRISTIAN. See DE HARVEN and COËRS, 7

COGAN, DAVID G. See KUWABARA and COGAN, 519

COX, J. See KARRER, 383

CRONKITE, EUGENE P. See TONNA and CRONKITE, 171

DALTON, A. J. See GATENBY and DALTON, 45

—. See SHELTON and DALTON, 513

DANON, DAVID, and MARIKOVSKY, YEHUDA. A method for avoiding centrifugation in the imbedding of suspensions in polymethacrylates, 298

DE HARVEN, ETIENNE, and COËRS, CHRISTIAN. Electron microscope study of the human neuromuscular junction, [143] 7

DE LAMIRANDE, GASTON, ALLARD, CLAUDE, and CANTERO, ANTONIO. Ribonucleic acid composition in cytoplasmic fractions isolated from rat liver cells, [311] 291

EAKIN, RICHARD M., and WESTFALL, JANE A. Fine structure of the retina in the reptilian third eye, 133

ELBERS, P. F. An improved grid-holder for the Siemens electron microscope, [144] 114

EPSTEIN, M. A. Observations on the fine structure of type 5 adenovirus, 523

FABRY, CLAUDINE. See ASCENZI and FABRY, 139

FINEAN, J. B. Electron microscope and x-ray diffraction studies of a saturated synthetic phospholipid, [144] 123

FITZGERALD, P. J. See HOWLING and FITZGERALD, 313

FITZ-JAMES, PHILIP C. See YOUNG and FITZ-JAMES, 467, 483, 499

INDEX TO SUBJECTS

ADENOVIRUS, type 5, fine structure, 523

Adepidermal reticulum in basal membrane of newt skin, fine structure of, 35

Aging process, effects on mucopolysaccharides of periosteum, studied in the rat using histochemical and autoradiographic techniques, 171

Alpharadiation absorption in biological materials, 197

Ameba, locomotion, effect of consistency (viscosity) of cytoplasm on, 437

—, *Pelomyxa carolinensis* Wilson, (*Chaos chaos* L.), complex patterns of mitochondria in, 85

—, *Pelomyxa carolinensis* Wilson, (*Chaos chaos* L.), nuclear-mitochondrial relationship in, 91

Amino acid incorporation into silk glands of *Bombix mori*, 293

— acid incorporation into soluble constituents of corneal stroma, effects of corneal epithelium on, 135

Antibodies, rabbit, aggregation of, studied in electron microscope, 407

Antigen-antibody reactions in agar, used as means of studying mitotic apparatus, 447

Antimetabolites, 8-azaguanine, effect on sporulation in bacteria, 499

Apoferritin, internal structure, revealed by "negative staining technique," 531

Ascomycete, *Neurospora crassa*, fine structure, 423

Autoradiography, observations on silk glands of *Bombix mori*, 293

—, uptake of H^3-labelled thymidine into hetero- and euchromatin in animal and plant, 457

—, used to demonstrate effect of corneal epithelium on amino acid incorporation into soluble constituents of corneal stroma, 135

—, used to study effects of aging on mucopolysaccharides of periosteum, 171

—, used to study nuclear-cytoplasmic interrelations of ribonucleic acid in human cells, 1

—, with alpha radiation, to determine mass concentration in cells and tissues, 197

—, with Ca^{45}, of pollen tube nuclei, 339

BACTERIA, cytoplasmic membrane during cellular division, 221

—, *Rhodospirillum rubrum*, photochemical activity and structure, 277, 285

—, *Streptomyces coelicolor*, membranous component in cytoplasm, 515

Bacterial spore, chemical and morphological studies on, formation, 467, 483, 499

Basement membrane, fine structure of adepidermal reticulum in newt skin, 35

Blood vessels, in the mouse, morphology of striated musculature of, 318

Brain, choroid plexus, frothy bodies in, 527

CAROTID body, cat, observations, 253

Cell boundaries (and the stratum Malpighii) in human epidermis, 71

— culture, human (Chang), long-term cultivation of in chemically defined medium, and effects of added peptone fractions, 535

— culture, neoplastic connective tissue mast cell capable of continuous growth, 361

— wall, of pollen grain, transfer of materials through, 537

Cells, mast, in neoplastic connective tissue, capable of continuous growth in culture, 361

—, plant, fixation with $KMnO_4$, 431

Cellular inclusions in measles virus infections, fine structure of, 379

Cerebral cortex, neuroglial fibrils in, 121

— cortex, two subcellular fractions isolated from homogenate of, 129

Chemoreceptor cells, in carotid body of the cat, fine cytology of, 253

Choroid plexus, frothy bodies in, 527

Chromatin, hetero- and eu-, in *Melanoplus* and *Secale cereal*, uptake of H^3-labelled thymidine into, 457

Chromatophores, "subchromatophore" particles in *Rhodospirillum rubrum*, 285

Cytoplasm, consistency (viscosity), and bearing on ameboid motion, analysis of endoplasmic velocity profiles of *Chaos chaos* L., 437

Cytoplasmic membrane in *Streptomyces coelicolor*, 515

— membrane of bacteria during cellular division, 221

— membranes and the nuclear membrane in a complex flagellate, 369

DIALYSIS employed to clarify suspensions to be imbedded in polymethacrylates without centrifugation, 298

Diazo coupling, for localization of cholinesterase by electron microscopy, 399

DNA per nucleus, changes in renal compensatory hypertrophy, 295

EISENIA *foetida*, fine structure of giant nerve fibers in, 61
Electron microscopy, improved grid-holder for Siemens instrument, 114
— microscopy, preparation of carbon films, 125
— microscopy, uptake of two new electron stains by cytoplasmic membrane, 179
Elodea, development and structure of proplastid in, 507
Emperipolesis, wandering of lymphocyte in and out of cells, 513
Endoplasm, velocity in, and ameboid motion, analysis of profiles of *Chaos chaos* L., 437
Enzymes, cholinesterase, electron microscopic localization by diazo coupling method, 399
—, glycolytic, changes in activities during mitotic cycle, 189
—, with activity in the M band, 163
Epidermis, human, cell boundaries and topography of the stratum Malpighii, 71
—, human, observations of melanocyte in, 41
Epithelia, cells of the gut of *Fasciola hepatica* L., 157
Epithelium, of *Hydra*, intercellular attachment in, 343
Erythroblasts, normal and in disease states, incorporation of ferrous molecules, 231, 237
Eye, lens fibers, studied in electron microscope, 97
—, reptilian third, structure of retina in, 133
—, retina, fine structure, 225
—, rod inner segment in frog, crystalline body in, 517

FASCIOLA *hepatica* L., epithelial cells of the gut of, 157
Ferritin and ferruginous micelles, at various sites, and in several metabolic states, in animals, 231
Fixation of plant cells with $KMnO_4$, 431
—, with $KMnO_4$, effects on nuclear envelope, 115
Fixatives, buffering, use of *s*-collidine as a basis for, 113
Frog, crystalline body found in rod inner segment of eye of, 517

GLYCOLYTIC enzymes, aldolase and D-glyceraldehyde-3-phosphate dehydrogenase, changes in activity during mitotic cycle in *Lilium longiflorum* microspores, 189

HEMOSIDERIN in the animal organism, different forms of, 237
Hydra, epithelium, intercellular attachment revealed by electron microscopy, 343
Hydronephrosis, experimental, in rat, proximal tubule cell in, 136

IMBEDDING of cell suspensions in polymethacrylates without centrifugation, 298
Intercellular attachment in the epithelium of *Hydra*, 343
— bridges between smooth muscle cells, in the form of protoplasmic anastomoses, 67
Intranuclear inclusions, in mouse liver and hepatoma, 427
Iron, compounds, structure of apoferritin, 531
—, different forms assumed and metabolism of, in animal organisms, 231, 237

KIDNEY, proximal tubule cell in experimental hydronephrosis, 136
—, rat, changes in DNA per nucleus in compensatory hypertrophy, 295

LENS fibers, studied in electron microscope, 97
Lilium longiflorum, changes in activities of glycolytic enzymes during mitotic cycle in microspores of, 189
Lipoprotein, experimental lipogenesis in Purkinje fibers, 519
Liver, normal and hepatoma, in mouse, intranuclear inclusions, 427
—, rat, ribonucleic acid composition in cytoplasmic fractions isolated from, 291
— regeneration, rat, effect of thioacetamide on, 393
Locomotion in protozoa, ameba, effect of consistency (viscosity) of cytoplasm on, 437
Lumbricus herculeus, spermiogenesis in, 45
Lymphocyte, wanderings within cells ("emperipolesis"), electron microscopic study, 513

MAN, neuromuscular junction in, electron microscopic study of, 7
Melanocyte of human epidermis, observations, 41
Membrane, cytoplasmic, behavior during cellular division in bacteria, 221
—, nuclear, reduplication in adenovirus-infected HeLa cells, 539
Membranous component in cytoplasm of *Streptomyces coelicolor*, 515
Metabolism of tissue slices, *in vitro* studies showing metabolic and physical factors influencing penetration of tetrazolium salts, 215
Microtomy, glass knives, new method for making, 305
Mitochondria, in erythroblasts, normal and abnormal, presence of iron, ferritin, and hemosiderin in, 231, 237
—, in *Pelomyxa carolinensis*, complex patterns of, 85
—, in *Pelomyxa carolinensis*, relationships with nucleus, 91

Mitochondria, membrane, structure and permeability properties, 241
Mitosis, dynamics of spindle formation and inhibition of same by chloramphenicol, studied in *Triturus* using polarized light, 193
—, regenerating rat liver, effect of thioacetamide on nuclear RNA, 393
Mitotic apparatus of sea urchin studied by means of antigen-antibody reactions in agar, 447
— cycle in microspores of *Lilium longiflorum*, changes in activities of glycolytic enzymes during, 189
— spindle formation and inhibition by chemicals, 193
Morphogenesis in plants, the proplastid, development and structure, 507
Mouse, intranuclear inclusions in normal liver and hepatoma of, 427
Mucopolysaccharides of the periosteum, effects of aging on, 171
Muscle, cells, smooth, intercellular bridges between, 67
—, elementary contractile system in *Vorticella*, fine structure, 126
—, heart, Purkinje fibers, experimental lipogenesis in, 519
—, M band, enzymatic activity in, 163
—, myoneural junction, cholinesterase localized by diazo coupling method for electron microscopy, 399
—, striated, of blood vessels, morphology, 383
—, striation patterns in rigor mortis, 419

NERVE fibers, giant, in *Eisenia foetida*, fine structure of, 61
Neuroglial fibrils in cerebral cortex, 121
Neuromuscular junction, in man, electron microscopic study of, 7
Neurons, sympathetic, of lizard, "reticular" and "areticular" Nissl bodies in, 77
Neurospora crassa, fine structure of mycelia, 423
Nissl bodies, "reticular" and "areticular" forms in sympathetic neurons of lizard, 77
Nuclear envelope after $KMnO_4$ fixation, 115
— envelope of animal cell, observations, 147
— inclusions in liver, normal and hepatoma, 427
— membrane and cytoplasmic membranes in a complex flagellate, 369
— membranes, reduplication in HeLa cells infected with adenovirus, 539
— RNA synthesis, primary site, 301
Nuclear-cytoplasmic interrelations, of ribonucleic acid in human cells, autoradiographic study of, 1
Nuclei, isolated from *Chaetopterus* eggs, permeability and structure of, 353
Nuclei, of pollen tube, studied in *Lilium longiflorum*, with autoradiography, 339
Nucleoli, isolated from *Pisum sativum* embryos, chemical properties of, 57
—, isolated from ungerminated pea embryos, 53
Nucleoprotein, changes occurring during plant tumor growth, 11
Nucleotide, uptake of tritium-labelled thymidine into hetero- and euchromatin, 457
Nucleus, basic protein of in plants, during normal and pathologic cell growth, 263
—, synthesis of cytoplasmic ribonucleic acid by, in *Amoeba proteus*, 203

OSTEONES, dissection technique and measurement of refractive index, 139

PANCREAS, demonstration with substrate-specific phosphatases of secretory capillaries in, 119
—, microsomal membranes, phospholipid turnover during enzyme secretion, 207
Parasite, malarial, *Plasmodium berghei*, phagotrophy and two new structures in, 103
Permeability properties of mitochondrial membrane, 241
—, and structure of isolated nuclei from *Chaetopterus* eggs, 353
Phagotrophy in the malarial parasite, *Plasmodium berghei*, 103
Phospholipid, saturated synthetic, studied in the electron microscope and by x-ray diffraction, 123
— turnover in microsomal membranes of pancreas during enzyme secretion, 207
Photochemical activity of chromatophore contained in "subchromatophore" particles in *Rhodospirillum rubrum*, 285
Photometric procedures, nature, significance, and evaluation of Schwarzschild-Villiger effect in, 313
Pisum sativum, chemical properties of isolated nucleoli of, 57
— *sativum*, isolation of nucleoli from ungerminated embryos of, 53
Plasmodium berghei, phagotrophy and two new structures in, 103
Polarized light microscopy, used to study dynamics of spindle formation and action on same of protein-synthesis inhibitor, 193
Pollen grain wall, transfer of materials through, 537
Proplastid, development and structure, 507
Protein, apoferritin, structure, revealed by "negative staining technique," 531
—, peptone fractions, effects of when added to

long-term culture of human cells (Chang), 535
Proteins of plant nuclei during normal and pathologic cell growth, 263
Protozoa, flagellate, nuclear and cytoplasmic membranes in *Trichonympha*, 369

RABBIT, antibodies, studied in electron microscope, 407
Rat, RNA composition in cytoplasmic fractions isolated from liver cells of, 291
Reproduction in plants, ferns, structure of the spermatozoid, 413
Retina, in reptilian third eye, structure, 133
—, rod inner segment, crystalline body in, 517
—, rods, morphogenesis of outer segments of, 225
Rhodospirillum rubrum, structure, 277, 285
RNA, composition in isolated cytoplasmic fractions of rat liver cells, 291
—, cytoplasmic, synthesized by the nucleus, in *Amoeba proteus*, 203
—, nuclear, in mitosis in regenerating rat liver, effect of thioacetamide on, 393
—, nuclear-cytoplasmic interrelations, autoradiographic study of human cells, 1
— synthesis, primary nuclear site of, 301

SCHWARZSCHILD-Villiger effect, nature, significance, and evaluation of, 313
Sea urchin, immunochemical studies on molecular origin of mitotic apparatus in, 447
Secretion of enzyme by pancreas, phospholipid turnover in microsomal membranes during, 207
Secretory capillaries in pancreas, demonstrated with aid of substrate-specific phosphatases, 119
Silk glands of *Bombix mori*, incorporation of C^{14}-labelled amino acids, 293
Skin, of the newt *Triturus*, fine structure of adepidermal reticulum in basal membrane of, 35
Spermatozoid, of *Pteridium aquilinum*, fine structure, 413
Spermiogenesis, in *Lumbricus herculeus*, 45
Sporulation in bacteria, effect of 8-azaguinine on spore and parasporal protein formation in *Bacillus cereus* var. *Alesti*, 499
— in bacteria, formation of spores in *Bacillus cereus*, 467
— in bacteria, spore and parasporal protein formation in *Bacillus cereus* var. *Alesti*, 483, 499
Stains, electron, new, quantitative measurements of uptake by cytoplasmic membrane, 179
Stratum Malpighii, topography, (and cell boundaries), in human epidermis, 71
Striated musculature of blood vessels, morphology, 383
Striation patterns of ox muscle in rigor mortis, 419

TETRAZOLIUM salts, penetration of tissue slices affected by metabolic and physical factors, 215
Triturus, adepidermal reticulum in basal membrane of skin of, 35
Tumor, growth in plant, nucleoprotein changes accompanying, 11

VIRUS, adeno-, nuclear membrane reduplication in HeLa cells infected with, 539
—, adeno-, type 5, fine structure, 523
—, infections, measles, structure of cellular inclusions, 379

X-RAY diffraction studies of a saturated synthetic phospholipid, 123
